The affordable Automated Order Execution System

-  Pharma Distribution
-  FMCG

What is SORTmat® <<

SORTmat® is an innovative order picking and dispatch system especially designed for the warehousing and distribution sectors.

It is a complete solution: handling, conveying, order picking, labelling, coding, invoicing, packaging, sorting and information control system.

SORTmat® has delivered dramatic increase in productivity and accuracy and optimal utilization of existing infrastructure in numerous applications.

SORTmat® is ideal for <<

- > The automation of the order fulfilment operations for wholesalers.
- > Increasing the throughput in automated or semi-automated warehouses.

- ✓ pharma
- ✓ tobacco
- ✓ FMCG
- ✓ e-shops

Benefits <<

- > Productivity increase/ greater daily throughput
- > Easy operation and error minimization
- > Operational cost reduction
- > Optimal utilization of space and available resources
- > Expandability due to modular design
(e.g. accommodates extra order picking zones)
- > Quick and easy installation and start-up
- > Typical ROI under 6 months
- > IoT ready
